***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species:
  - (A) the specifics of the device being comprised of particular and distinct details of the coupling member (an embodiment drawing to claims 6-8);
  - (B) the specifics of the device being comprised of particular and distinct details of the coupling member (an embodiment drawing to claim 9);
  - (C) the specifics of the device being comprised of particular and distinct details of the coupling member (an embodiment drawing to claims 10-11);
  - (D) the specifics of the device being comprised of particular and distinct details of the coupling member (an embodiment drawing to claim 12).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In
